

NYLYN™

TECHNOLOGY

Composed of Trylon™ filaments, the Pintar NYLYN™ brush will give you superior coverage. This brush is tapered for precision control and is ideal for any surface.

All brushes are manufactured to the highest professional quality standards. Trylon™ is a unique tapered, modified synthetic filament that provides a far-superior performance than conventional filament blends. The filaments are ideal for all paints and stains and stay stiffer longer, while holding and retaining a better shape.

Above all NYLYN™ holds and releases more paint and the advanced cleanability is a time-saver for today's professional painter.

- SUPERIOR TAPER
- PRECISE CUTTING IN & TRIM
- HOLDS & DELIVERS MORE PAINT
- ULTRA-SMOOTH FINISH
- PAINT FASTER
